

# Care Coordination

MAINTAINING CHILDREN AND ADOLESCENTS IN THE COMMUNITY.

Care Coordination is an in-home, community-based program that collaborates with families of children and adolescents with behavioral and emotional challenges by identifying family strengths and arranging appropriate supports and services to maintain children or adolescents in the community. The program is child-centered, strengths-based, family-driven and culturally sensitive.

Families are active participants in all aspects of the program, including:

- Identification of strengths and needs
- Identification and articulation of the family's vision
- The development of a plan of care, which will help the youth to successfully remain at home or in the community

Care coordinators also work with parents to identify their social, mental health, family, school/work, cultural, spiritual, safety, legal, medical, finances, relationships and other needs to develop connections to services and organizations in the community that most effectively meet their needs and preferences.
